

CHURCH EMERGENCY CHECKLIST

The Waco Regional Baptist Association is a voluntary network of Baptist churches in Central Texas who have chosen to cooperate in order to extend and embody the good news of Jesus Christ.

Is your church prepared for fires and other emergencies? Hopefully, nothing will ever happen to our churches and homes. But if they did, are you prepared for it?

Here is a list of practical things to take note of and double-check. They may be prove to be very useful.

- * Do you have working smoke detectors?
- * Do you have emergency numbers handy?
- * Do you have computer data backed up off campus?
- * Do you have a plan to evacuate your church building or house in the event of a fire or other disaster?
- * Is your insurance coverage up to day? Have you included recent upgrades, renovations, or new buildings in your coverage?
- * Do you have legal papers and important documents stored in a fireproof/waterproof box?
- * Do you have a current picture inventory of your structure and contents?
